

# Friendly Reminders

- **Water Line Responsibilities:**

- It's the sole responsibility of the property owner to install, maintain and repair the water service line from the curb stop and the owner's property.
  - This includes, but is not limited to:
    - Water Line Freeze-ups
    - Water Line Breaks
    - Water Line Replacements/Upgrades
- It's also important to remember, if you choose to run your water (even a small trickle) during the winter months to prevent water line freeze-ups, you are responsible for the "extra" water usage.

- **Sump-Pumps:**

- Sump-Pumps that pump into the municipal sewer system are strictly prohibited.
